

Trainee doctors: Make sure you have your say

What do you think about your training?

Do you receive adequate clinical supervision?

What works well and what could work better?

Are you gaining the experience you need to become a consultant or GP?

Take part in the third national survey of trainee doctors.

An email, containing a link to the online survey, and a unique Survey Access Code, will be sent to all trainees in approved training posts, including foundation doctors, during January and February 2009. This invite will come from surveyinvitation.donotreply@pmetb.org.uk

The email addresses are supplied to us by your deanery. You can check that we have your correct email address by going to: www.pmetb.org.uk/traineesurvey

If you are not in the database you must submit your details for inclusion in the survey. Upon successful completion of the survey you will be emailed a PDF receipt. This is important as your deanery may require you to produce it.
